EDUCATION

Texas A&M University, College Station, Texas

May 2026

Bachelor of Science in Computer Engineering - Math Minor

GPA: 3.56/4.00

Relevant Coursework: Intro and Advanced Software Engineering, Database Systems, Data Structures and Algorithms.

PROGRAMMING SKILLS

JavaScript – React, Node, Python, C++, HTML, CSS, SQL – PostgreSQL, CypherQL, Ruby – Rails; Tools: GCP, AWS, Git, AI.

WORK EXPERIENCE

GigemAI – Lisam Systems, Remote – College Station, Texas

AI Solutions Specialist

Jan 2025 – Present

- Launched a tool, leveraging JavaScript – React & Node, hosting an AI Agent, pipelined with Python, of a Fine-Tuned OCR Model to expedite and automate the data extraction, visualization, and download process with documents like Shipping Labels for client needs. Solo Project.
- This led to a **90% cost cut** from manual labor to an AI Agent, fully pipelined and hosted on the Cloud using GCP.

Aggies Create, College Station, Texas

Co-Lead Full Stack Developer

Aug 2024 – Dec 2024

- Launched Med Get, utilizing an AI Agent and Data Visualization techniques to aid decision-making for NeuroX1, our sponsor. Worked under 'Agile' in a team of 4.
- Developed using JavaScript, React and Node, for the full-stack app, and Python, Langchain and RAG, to use a Hybrid Model Architecture, HMA, to combine an NLP LLM with BioMixtral 8x22B for an optimal AI Agent.
- Leading to a **5x boost in productivity** by cutting down data retrieval time and a **62% cost cut** per hour by any employee user, our app aided data retrieval, collection, and display for the client.

Full Stack Developer

Jan 2024 – May 2024

- Built Med Get prototype primarily using Python for Full-Stack and AI development. Worked in a team of 4.
- Applied libraries like Streamlit, PyChart, Langchain, and introduced the idea of RAG and JavaScript migration.
- The prototype used as initial '**funding**' **MVP to acquire a backing of \$2000/month** for the final product's needs, mainly cloud costs for Database, App Hosting, and AI training and inference.

OpenHub, Louvain-La-Neuve, Belgium

Software Engineering Intern

Jun 2024 – Aug 2024

- Developed a full-stack app to run and manage a 3D Printer Farm remotely and efficiently by the head engineer, leveraging JavaScript, React.js, Node.js and Python. Solo Project.
- Leading to an **increase in efficiency, 7x the number of available 3D Printers**, making it able to be used by dozens of employees at a time.

Headstarter.ai, Remote

Software Engineering Fellow

Jul 2024 – September 2024

- Got mentored by and shadowed industry professionals from Tech companies like Google, Meta, Apple, and Doordash; startup Founders from the US and the world; and research professionals from Stanford and Berkeley.
- Kickstarted and worked on 5 different Full-Stack and AI projects leveraging various technologies: JavaScript, React.js, Node.js, Python, AWS, GCP, Firebase, RAG, LangChain, Pinecone, and various AI Models/LLMs.

PROGRAMMING PROJECTS

Practice Problem Generator | University-Sponsored Project

Jan 2025 – May 2025

- Worked in a team of 6, under 'Agile', to develop a full-stack Problem Generator App for the Engineering Department at Texas A&M University, specifically for the Physics/Engineering 216 Class with a Professor as a client.
- Leveraging mainly Ruby on Rails and HTML with CSS, the app led to a randomized and automated generation of 40 different template problems from 10 topics **leading to an infinite combination of practice for a student**.

LEADERSHIP AND COMMUNITY ENGAGEMENT

Software Engineering Consultant at Aggies Create, College Station, Texas

Jan 2024 – Dec 2024

- Co-Lead Full-Stack Developer on a consultancy project given by NeuroX1, a biotech startup in Austin, Texas.
- Won 3rd Place on Spring 2024's awards for best teams due to Med Get, NeuroX1's project.

Software Engineering Study Abroad, Singapore, Singapore

Dec 2024 – Jan 2025

- Explored Singapore whilst refining my Software Engineering technical and non-technical skills and networking.

Computer Architecture Study Abroad, Louvain-La-Neuve, Belgium

May 2024 – Jun 2024

- Explored Europe whilst refining my non-tangible and Engineering skills and networking.

ADDITIONAL SKILLS AND INTERESTS

Languages: Fluent in *English* and *Spanish*

Interests: Basketball, Gym, Billiard, Traveling, Personal Finance, Startups, New Tech: AI Agents, ML, Quantum Computing.

Certificates: Cypher Graph Data Science, AWS: Architecting Solutions, Designing Data Lakes, Cloud Technical Essentials.
