Alonso Peralta

Texas, USA | +1 (907) 744-8406 | alonso.pe03@gmail.com | linkedin.com/in/aperalta03 | alonsoperalta.com

Education

Texas A&M University *College Station, TX*

Master of Computer Science; GPA: 3.75/4.00 *Dec. 2027*

- Analysis of Algorithms, Deep Reinforcement Learning, Information Storage and Retrieval, Artificial Intelligence, Cloud System Design, Machine Learning

Bachelor of Science in Computer Engineering, Minor in Mathematics; GPA: 3.65/4.00 *May 2026*

- Advanced Software Engineering, Data Structures & Algorithms, Database Systems

Experience

Lead AI Engineer *May 2026 – Present*

ValencAI *Remote*

- Productionizing enterprise ExtractAI: designed the VLM training schema and a pipeline (OCR/layout, cleaning, pgvector search, VLM + fine-tuned LLM orchestration) that turns inconsistent cross-industry PDFs into structured JSON for enterprise databases and Valenc's Flagship System
- Own AI roadmap for sales and marketing driving ARR: ExtractAI, MVP to Prod. SDS Caller, RAG-powered AI voice assistant emergency responders, POC to MVP. Reg Agent, a regulations ML-agent, into POC

AI Software Engineer *Oct. 2025 – Apr. 2026*

- Finalized ExtractAI v1 and took it to a few thousand dollars in MRR
- ExtractAI at 98%+ SDS accuracy (at or above manual labor), cutting processing from 2–3 weeks to 10 minutes and cost from \$2k–\$3k to \$30–\$50 per 1000 pages

AI Solutions Specialist *Jan. 2025 – Oct. 2025*

- R&D where the ExtractAI and SDS Caller ideas were born; scoped client problems before either product was finalized

Co-Lead Full Stack Developer *Aug. 2024 – Dec. 2024*

NeuroX1 *College Station, TX*

- Co-led a team of 4 to deliver Med Get, an AI-powered data retrieval and visualization app
- Implemented a hybrid retrieval architecture (LLM + BioMixtral 8x22B via LangChain) and a RAG system, achieving 5x faster data access and reducing costs by 62% per employee hour
- Built and delivered a functional full-stack platform using React, Node.js, and Python, later adopted by the sponsor

Full Stack Developer *Jan. 2024 – May 2024*

- Prototyped the first version of Med Get using Python (Streamlit, PyChart) and early RAG concepts
- Secured \$2000/month sponsorship funding by delivering a working MVP used as a proof-of-concept

AI Software Engineering Fellow *July 2024 – Sep. 2024*

Headstarter.ai *Remote*

- Completed an industry fellowship with mentorship from engineers at Google, Meta, Apple, and DoorDash, tech founders from the US and around the world, and research professionals from Stanford and Berkeley
- Built five AI-enabled full-stack projects, leveraging JavaScript, Python, LangChain, Pinecone, AWS/GCP, Firebase, LLM APIs, and Computer Vision

Technical Skills

Languages: Python, TypeScript, JavaScript, Bash, C++, SQL, Ruby, HTML, CSS
Frameworks: FE: React, Streamlit, Tailwind; BE: Node, Express, Ruby on Rails, OpenAPI, FastAPI, Pydantic; Cloud: Terraform, Redis, ARQ, Microservices, Logging, IAM; AI: LangChain, LangGraph, LlamaIndex, CrewAI, OpenMCP, DocAI, LLM (Cloud + Local), pgvector, RAG, Fine-Tuning, AIVoice
Developer Tools: AWS, GCP, Git, Docker, CI/CD, AI Tooling, Excel
Spoken: English, Spanish
Certificates: Cypher Query Language; AWS Architecting Solutions, Designing Data Lakes, Cloud Technical Essentials
Interests: Basketball, Gym, Billiards, Traveling, Finance, Startups, System Design, AI/ML, Quantum Tech
